🔗 Zoho CRM Integration

Current Setup
- All 3 lead forms (Home, About, Contact pages) submit via `fetch()` with `mode: 'no-cors'` to the Zoho Connected Workflow URL
- Fields captured: **Name, Mobile, Email, Loan Type, Loan Amount, City**
- On form submit → WhatsApp auto-opens with pre-filled message to `+91-7249108474`

Code Location
```
src/components/LeadForm.jsx
```

⚠️ To Finalize Zoho Webform Integration
1. Login to Zoho CRM → **Settings → Webforms**
2. Create Webform with fields: Name, Mobile, Email, Loan Type, Amount, City
3. Copy the **Form Action URL** (e.g., `https://crm.zoho.in/crm/WebToLeadForm`)
4. In `LeadForm.jsx` line 4, replace:
   ```js
   const ZOHO_URL = 'https://crmplus.zoho.in/...';
   ```
   With the new Webform Action URL
5. Then push:
   ```powershell
   git add .; git commit -m "fix: Zoho Webform URL"; git push
   ```
   Vercel auto-redeploys in ~60 seconds ✅

💬 WhatsApp Integration

Component	Detail
Floating Button	Fixed position, bottom-right, all pages, green color
Link	`https://wa.me/917249108474?text=Hello!%20I'm%20interested%20in%20a%20loan.%20Please%20guide%20me.`
Form Fallback	On lead form submit → new tab opens with pre-filled WhatsApp message including the lead's details
Contact page button	Direct "Chat on WhatsApp" link

⚙️ Vercel SPA Routing Fix

File: `vercel.json` (project root)

```json
{
```

```
  "rewrites": [
    { "source": "/(.*)", "destination": "/index.html" }
  ]
}
```

> This is required for React Router to work on Vercel. Without it, direct URL access (e.g., `avani-loan-services.vercel.app/contact`) returns 404. **Do NOT delete this file.**

⚙️ Auto-Deploy Flow

```
Edit code locally
      ↓
git add . → git commit -m "..." → git push
      ↓
GitHub receives push
      ↓
Vercel auto-detects → runs npm run build
      ↓
Live at https://avani-loan-services.vercel.app ✅
(~60 seconds total)
```
